

RFP 09-24, Addendum 1

RFP 09-24, Greenhouse Gas & Emissions Inventory

City of Fayetteville – Purchasing Division
113 W. Mountain – Room 306
Fayetteville, AR 72701
Phone: 479.575.8220

Date: Wednesday, December 09, 2009

To: All interested parties

From: Andrea Foren, CPPB, Purchasing Agent

Notice: This addendum is hereby made a part of the proposal documents to the same extent as though it were originally included therein. Proposers should indicate their receipt of same in the appropriate blank listed herein. Failure to do so may subject vendor to disqualification. Addendum shall be attached to the inside cover of the bidding documents, signed, and dated.

- 1.) Reference page 7, Selected Firm's Responsibilities: expected completion date shall be reflected as June 2010 as opposed to June 2009.
- 2.) Per the Energy Efficiency and Conservation Block Grant application \$10,000 is the **maximum** that has been budgeted for all items in this RFP.
- 3.) Not all data has been compiled for this project; however, some data has been compiled and will be provided (such as electric, natural gas, diesel, & gasoline). Remaining data necessary to meet the Local Government Operations Protocol will need to be identified by the firm and collected by working with various City departments.
- 4.) Regarding, the website envisioned for this project: Project 2 degrees (www.project2degrees.org) is a web-based application developed by ICLEI, Clinton Climate Initiative and other partners to track greenhouse gas emissions. This application resembles what the City of Fayetteville envisions. However, considering the online availability of utility data, the City is interested in pursuing a software and web-based tool that will eliminate a majority of the data entry requirements for staff by automatically extracting utility data from current online resources while still allowing for manual entering of other data.
